

ENERGY PARTNERSHIP PROGRAM

The Mule Deer Foundation in North Dakota has worked closely with the North Dakota Petroleum Council over the past years with support for our youth program, M.U.L.E.Y. and our conservation efforts in North Dakota. Many industry partners have assisted in donations toward our projects or in kind equipment and labor which has been an incredible benefit to our mission, “the conservation of mule deer and their habitat”. Working with NDPC, we have developed an exciting opportunity for your company to become an Energy Partner with the Mule Deer Foundation that will not only increase funding for projects, generate some conservation recognition but will also provide a fun and entertaining opportunity for you, your employees or customers.

“The North Dakota Petroleum Council has been working with MDF as it has given us a great opportunity to provide insight on how the industry is working to minimize the impact on habitat. We also have the opportunity support an organization that shares the same passion as a lot of our members, their employees and customers in the state of North Dakota.” - Ron Ness, President NDPC
